CAUTION TO THE PUBLIC. To avoid imposition, purchasers of Waltham Watches will observe that every genuine watch, whether gold or siver, bears our trade-mark on both case and movement. Gold cases are stamped "A. W. Co." and guarantee cer-"Am. Watch Co., Waltham, Mass., Sterling Silver," and are accompanied by guarantee certificates, signed R. E. Robbins, Treasurer. The name "Waltham" is plainly engraved upon all movements, irrespective of either distinguishing marks.

This caution is rendered necessary by reason of the fact that our cases are frequently separated from our

fact that our cases are frequently separated from our movements and put upon worthless movements of other makers, and vice verse, thus affecting injuriously the per-formance of the watches and vitiating our guarantee, formance of the watches and vitiating our guarantee, which is intended to cover only our complete watches wholly made by us. It is necessary, also, because it is so notorious as to be a public scandal, that there is great fraud in the metal quality of both gold and silver cases as now generally sold. We have demonstrated by frequent assays that many gold and silver cases offered in the market are debased from 10 to 20 per cent. from the quality they assume to be. This is a fraud upon the purchaser, and accounts for the low price at which such cased watches have been sold. cased watches have been sold.

We take this occasion to announce that we have recently entirely remodelled the very popular grades of full plate movements, known by the marks, "Wm. Ellery," "Appleton, Tracy & Co.," "Waltham Watch Co.," "P. S. Bartlett," and "Broadway," giving to them not only a highly improved appearance, but great additional value. We embody in them such of the best results of our experience and study for twenty years as can be useful in this popular form of watch. We give these new model watches special recommendation to all who look for good percased watches have been sold. special recommendation to all who look for good per-formance and solid excellence at moderate cost. The alterations have been made with the view of pleasing practical watch makers, as well as watch wearers. We avail ourselves, too, of this occasion to warn the public against cheap watches. The superiority of Waltham goods, in all grades, is now so generally acknowledged that our competitors, Swiss and American seem to have no resource but to present the attraction of low price. Their goods being inferior to ours, they have to sell them for what they can get. Times are hard, and

people generally not knowing a good watch from a bad one, very often allow a small price to decide them. William Morris, the eminent English Lecturer on Artand Labor Topics, in a recent lecture delivered before the "Trades Guild," says:

"I know that the public in general are set upon having things cheen being as ignorant that they do not know things cheap, being so ignorant that they do not know when they get them nasty, also so ignorant that they neither know nor care whether they give a man his due; I know that the manufacturers, 'so-called,' are so set on carrying out competition to its utmost, competition of cheapness, not of excellence, that they meet the bargain hunters half way, and cheerfully furnish them with nasty wares at the cheap rate they are asked for, by means of what can be called by no prettier name than fraud." We are much mistaken if this is what the public wants or expects, of us, at least. Good watches cannot be madwhen neither workman nor employer has pride in his occupation; interest and pleasure in the work are both wanting, and both are essential to good watch-making. Low price, especially in watches, MEANS LOW QUALITY, with Low PERFORMANCE AND HIGH REPAIRS. Our mission was, and our business is, to make good watches, whatever the cost; holding firmly to this single purpose, we have seen improvement in quality and re-duction in cost, by means of discoveries and improve nents in machinery and by natural causes, go steadily or gether, until we can truly say, Waltham Watches, in heir respective grades, are the best watches made, and to the lower grades, they are within reach of everydy who earns wages. Our prices are as low as they ght to be, and as low as they will be. Watches cannot made for nothing, even by machinery. We say to the tblic, buy a good watch while you are about it, and pay is proper price for it. The more you pay an honest dealer the better satisfied you will be in the end; don't be de-eived by cheapness—quality descends faster than price. For American Watch Co., of Waltham, Mass.

But there the Samoan Islands (who are mostly Germans) have seems to have been at least no letting down in scholarship. In some respects we can notice a decided improvement. We can say, that there has to import their laborers, as we do at the Hawaiian Islands. By a recent letter from Apia, we learn that besides the production of Cobra, or dried cocoabeen a marked improvement in the government of nut, there are a number of sugar plantations althe school.

the scholars for roll call and entry into the school rooms, and the like precise order in disthem. This system contributes to discipline and punctual habits. The school is orderly, well behaved and attentive to duties, with little restlessness or disposition to make annoyance on the part of the pupils. We can also commend in unqualified terms the great improvement in penmanship. Penmanship, which has often been complained of as neglected, has this year been successfully taught. We are also gratified that vocal music has received a more thorough attention than it has of late years. In drawing there has been as much improvement as could be expected, from the general character of
